Books

- In preparation* *Evolution Without Change: The Puzzles of Evolutionary Stasis*. Examines three explanatory puzzles: (1) living fossil taxa; (2) larger-scale patterns of stasis in the fossil record; (3) coordinated stasis in paleoecology. Argues that stasis is a good test case for thinking about the structure of evolutionary explanations.
- Expected 2019* *Paleoaesthetics and the Practice of Paleontology*, under contract with Cambridge University Press for the new [Cambridge Elements](#) series. The manuscript has been accepted for publication with minor revisions.
- 2011 *Paleontology: A Philosophical Introduction*. Cambridge University Press
Turkish translation by Nivart Taşçı, Bogaziçi University Press, 2014.
- 2007 *Making Prehistory: Historical Science and the Scientific Realism Debate*. Cambridge University Press.
